

Concerned About Your Child's Developmental Milestones?

The Richie McFarland Children's Center Can Help.

Our **Pediatric Therapy Program** provides one-on-one occupational, physical, or speech therapy services and early childhood education for children ages birth to six. If your child does not qualify for entitlement programs such as Early Supports and Services or Preschool Special Education, the specialists at RMCC can provide individualized treatment.

We partner with parents and other caregivers to help children reach their full developmental potential and strengthen their skills.

Our Services Include:

Physical Therapy – promotes development of functional motor skills, including balance, strength, endurance, coordination, mobility, flexibility and motor planning.

Occupational Therapy – promotes development of sensory processing, fine motor, gross motor, self-care and play skills.

Speech Therapy – promotes development of articulation, language, feeding/swallowing and social communication skills.

Early Childhood Education – promotes development of social, play, early learning, problem solving and receptive language skills.

An **Evaluation** is a written report that includes recommendations from standardized assessments, clinical observations and parent report.

Please call 603.778.8193 or email info@richiemcfarland.org to learn more about RMCC's Pediatric Therapy Program or to schedule an appointment.

Billing for Private Pediatric Therapies

Services are billed per session or per evaluation. Insurance coverage may apply however families will be responsible for any non-covered services, deductibles or co-payments. RMCC staff can provide guidance in helping families maximize their insurance coverage.
